Leading the Future of CCTV Solutions

Delivering Excellence in Security and Cybersecurity

Who We Are

Provision-ISR is an **Israeli multinational company** and one of the world's fastest-growing CCTV brands. We serve more than 40 countries across five continents with branches and official exclusive distributors working as partners to promote the brand in their regions.

Our Mission

At Provision-ISR, we aim to deliver **cutting-edge CCTV solutions** fortified by **state-of-the-art cybersecurity** and **advanced AI analytics** that safeguard people, property, and businesses. We're committed to providing high-quality products and exceptional support, exceeding industry standards.

Our Israeli DNA

Security Arena

Since its establishment, the geopolitical tensions that have affected Israel have prompted the industry to invest in emergency and crisis management in the security arena: **cyber security, intelligence, and critical infrastructure protection** allowing security manufacturers like Provision-ISR to gain unparalleled expertise in their field.

High-Tech and Cyber

As a Start-Up Nation, Israel is a central hub for **tech innovation**, especially in cybersecurity, positioning itself as a significant player in the broader high-tech landscape. This **commitment to excellence** extends to Provision-ISR, as we collaborate with **Check Point Software Technologies Ltd., a cybersecurity leader**. Today, more than ever, the security market must have protected and ready-to-use CCTV devices.

Our Approach and Ethics

Western Business Approach

Motivated by our Israeli DNA, our approach prioritizes lasting human connections. Grounded in respect and continual evolution, **we believe in forging enduring partnerships**. This approach reflects our commitment to collaboration, trust, and adaptability, which are essential for success in the dynamic global market.

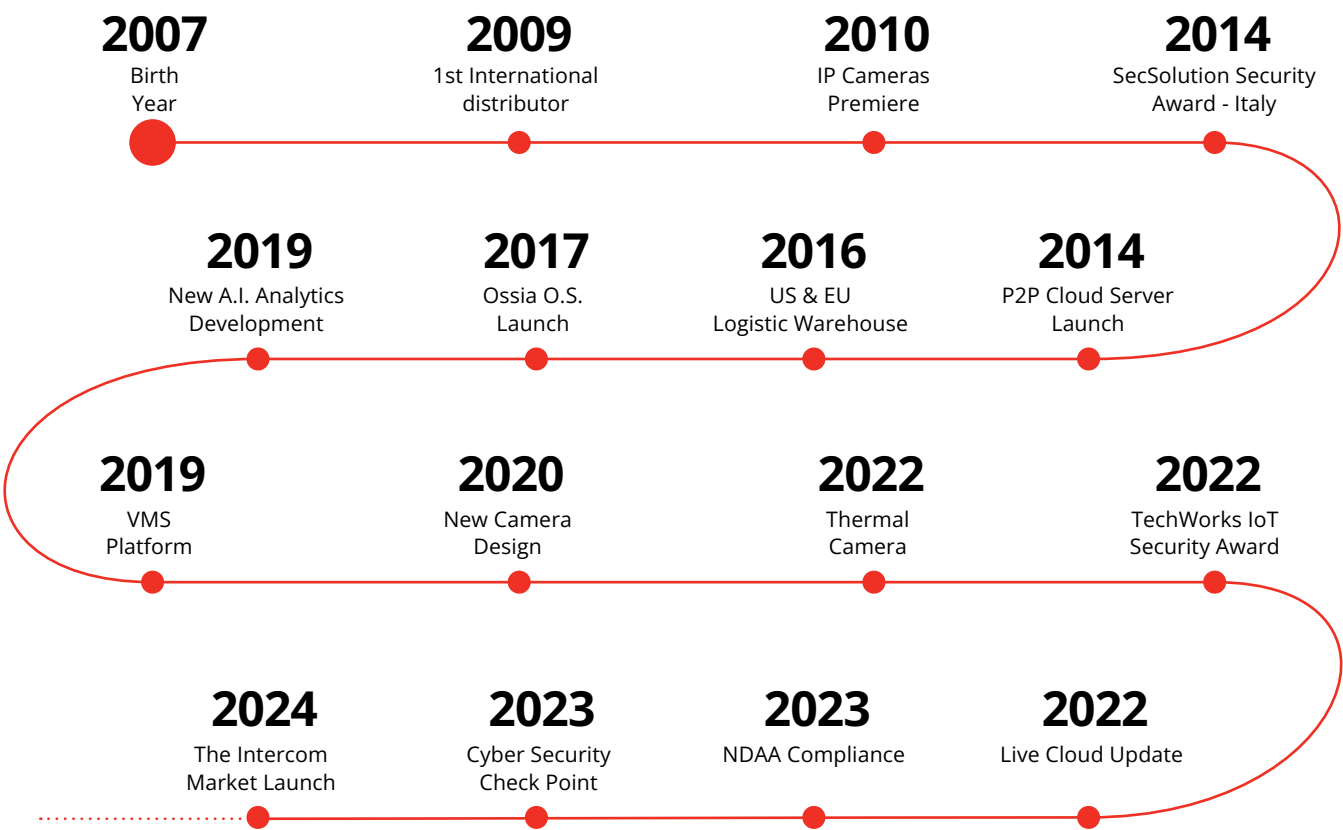

Ethics

At Provision-ISR, our ethical commitment is a principle and a daily practice. **We safeguard every participant in the supply chain, from major distributors to small installers**, recognizing and respecting the unique professionalism each brings. Embodying a holistic approach, Provision-ISR views every link in the chain as **integral to perfection**. Those who choose Provision-ISR do so confidently, assured by the Brand's consistent demonstration of ethical values through actual actions, **encouraging trust and reliability** in every interaction.

Global presence

Stepping Stones

Introducing Provision-ISR's New Website: Your Digital Hub for Success

Empowering Installers and Distributors

A Streamlined Digital Experience:

Effortless Navigation: Locate the products you need quickly with our intuitive filtering system.

Invaluable Resources: Gain insights and best practices with in-depth case studies, informative tutorials, and comprehensive training resources.

Stay Informed: Get the latest updates on products, apps, and technology delivered straight to your fingertips.

Global Reach: Our platform seamlessly adapts to multiple languages, making it accessible no matter your location.

Dedicated Service: Easily access our open ticket support system and contact information to get the assistance you need, whenever you need it.

Connect, Learn, and Lead:

Connect: Stay informed and engaged with the latest industry trends.

Learn: Expand your knowledge with valuable resources to enhance your skills.

Lead: Become a true expert in your field by leveraging our comprehensive training materials.

Get Support: Enjoy peace of mind with our dedicated service options, including open ticket support and easy access to contact information.

Visit our website and discover your digital advantage!

www.provision-isr.com

Our Ecosystem Solution

Products, Software, and Solutions for Complete Security

The Provision-ISR Ecosystem: Comprehensive Hardware, Software, and Solutions

Provision-ISR offers a robust ecosystem of **hardware**, **software**, and **solutions** tailored to various surveillance needs. Our diverse **hardware** lineup includes advanced surveillance cameras—**Dome/Turret**, **Bullet**, and **PTZ**—designed for commercial, residential, industrial, and governmental sectors. Equipped with **built-in cybersecurity** and **AI analytics**, these cameras provide specialized functionalities such as **License Plate Recognition (LPR)**, **thermal imaging**, and **face recognition**. Our **Network Video Recorders (NVRs)** and **Digital Video Recorders (DVRs)** support applications from small businesses to large enterprises, while our **VMS platform** enables centralized monitoring with **video walls**, **people tracking**, **maps**, and more. Complementing these are a wide range of accessories, making Provision-ISR a one-stop shop for security solutions.

Our **software** turns CCTV systems into proactive tools, utilizing **AI** to offer **loitering detection**, **sterile area monitoring**, and **access control** through face recognition. Developed by a skilled team in **Kfar Sava**, the software is **user-friendly**, with intuitive interfaces and customizable features. From the **Ossia recorder interface** to the **Provision Cam2 app** and the advanced **OSSIA VMS**, our software provides seamless control for both small setups and large-scale operations.

At the heart of our **solutions** is constant innovation, responding to market demands with technologies such as **color-at-night cameras**, **parking management systems**, and **thermal solutions** for fire prevention. With **ONVIF compliance** and **third-party integrations**, Provision-ISR delivers **turnkey solutions** that ensure security systems are adaptable, efficient, and future-ready.

Protecting your privacy

Focus in cyber security!

Cyber Security

Raising the bar in CCTV Cyber Security!

In an ever-evolving landscape of cyber threats, compromise on the cybersecurity of your CCTV is no longer an option. In collaboration with **global cybersecurity leader Check Point Software Technologies Ltd.** and their **integrated Quantum IoT Nano agent** that provides an advanced threat prevention layer against the common attack vectors at runtime, Provision-ISR leads a revolution in the CCTV industry, ensuring **unparalleled protection** against emerging threats.

NDAA

Provision-ISR is committed to offering products that **adhere to the exacting regulations** of the U.S. Department of Defence outlined in **Section 889 of the NDAA**.

In today's interconnected world, where security is paramount and threats of espionage dominate, **Provision-ISR guarantees product delivery that meets the highest security and regulatory requirements.**

GDPR

Since May 2018, the enactment of the European Privacy Regulation 2016/679, commonly referred to as GDPR (General Data Protection Regulation), has set the standard for safeguarding personal data.

At Provision-ISR, our **unwavering commitment to compliance** ensures that the information we retain as a manufacturer **remains secure and private**, and all our products strictly **adhere to the European GDPR**.

AI-Powered Video Analysis: A New Era of Surveillance

Revolutionizing Security through Advanced Object Recognition and Metadata Management.

AI is revolutionizing the way surveillance systems operate. By harnessing its power, cameras can go beyond simple recording to provide intelligent insights and proactive security. From detecting anomalies and suspicious behaviors to optimizing resource allocation and gaining valuable insights, AI-powered video analysis empowers you to make informed decisions, enhance compliance, and gain a competitive edge.

Imagine a surveillance system that not only records footage but also actively identifies potential threats, alerts you to suspicious activities, and helps you optimize your operations. With AI-powered video analysis, this is no longer a futuristic concept but a reality. By leveraging the power of artificial intelligence, your surveillance system can become a strategic asset that helps you protect your assets, improve efficiency, and drive business success.

General Analytics

Basic but essential functions that provide foundational security features, like Camera Tampering and Motion Detection.

Motion Detection

Older CCTV systems use basic motion detection to trigger recording or alerts by detecting changes in the camera's view. However, this method often causes false alarms from minor movements

Camera Masking

Camera masking detection alerts you instantly when a camera is being blocked or covered by spray or objects, ensuring you're aware of any attempts to disable your security system.

Camera Offsetting

Camera offset detection notifies you immediately when a camera has been tampered with or shifted from its original position, ensuring your surveillance stays focused on the intended areas.

DDA1 (A.I. Object Recognition)

Provision-ISR's DDA™ Video Analytics uses object recognition technology (and thus advanced artificial intelligence algorithms) to differentiate **between humans, two-wheeled, and four-wheeled vehicles**.

Thanks to this technology, the system will only trigger alarms or push notifications when the object of interest violates the pre-set rules. This **significantly reduces false alarms** caused by external factors like rain, shadows, changes in lighting, moving vegetation, or passing animals.

DDA1 Sterile Area

Keep the area safe with unauthorized access detection, alerts, and regulatory compliance.

DDA1 Line Crossing

Accurately detects human and vehicle intrusions, ensuring perimeter security.

DDA1 Object Counting (Line)

Monitor customer flow with precision to manage store capacity, staffing, and peak times effectively.

DDA1 (A.I. Object Recognition)

DDA1 Object Counting (Area)

Manage checkout lines efficiently by tracking queue lengths, improving customer satisfaction and staff deployment.

DDA1 Loitering Detection

Identifies loiterers, enabling prompt staff intervention to ensure children's safety from threats.

DDA1 Illegal Parking Detection

Identifies and alerts about unauthorized parking in restricted zones or fire lanes, ensuring compliance and enhancing safety.

DDA2 (A.I. Advanced Object Classification)

With the advanced artificial intelligence embedded in Provision-ISR cameras, we've eliminated false alarms by accurately identifying humans, two-wheeled and four-wheeled vehicles. Now, we take it a **step further with the second-generation DDA™ Video Analytics**. By having the ability to **show detailed metadata** analysis for each object type, we ensure unparalleled precision in surveillance, minimizing false alarms and enhancing security efficiency.

Second-generation DDA™ can analyze surveillance images more accurately. For example, this can improve the efficiency of forensic investigations by providing critical information for suspect identification and event reconstruction.

Metadata for 4-Wheeled

Brand (Mazda, Renault, Volkswagen, Etc.), Color, Model (Golf, Kangoo, Tucson, Etc.), Type (Car, SUV, Bus, Etc.), and Year.

Metadata for 2-Wheeled

Type (Bicycle, Electric Bicycle, Motorcycle, Tricycle).

Metadata for Humans

Age Estimation, Backpack, Gender, Glasses, Handbag, Hat, Mask, Lower and Upper Clothes Type & Color, Direction of Movement.

A.I. Face Detection and Recognition

This group focuses on functions related to facial detection and recognition, essential for security systems that require precise identification.

Face detection

Utilizes advanced facial recognition to quickly identify and locate individuals, enhancing security.

Face recognition

Boost security and manage staff effectively by using facial recognition for access control.

Special features

Include more unique features like License Plate Recognition (LPR), Parking Lot Management, Fire Detection, and Temperature Monitoring.

AI (Heatmap)

Analyzes movement patterns to optimize space layout and enhance the overall user experience.

Audio Exception

Detects sudden changes in ambient sound, alerting in case of unexpected noises starting or stopping to ensure safety and asset protection.

LPR (License Plate Recognition)

Monitors license plates in surrounding areas, enhancing security and access control.

Fire Detection

Provides early fire detection to minimize potential damage to assets and infrastructure.

Temperature Monitoring

Measure, monitor, and control temperature for optimal performance and safety.

Thermal Imaging.

Ensure the security and integrity of your materials with precise monitoring and control.

o = Require NVR

Ossia O.S.

Simple and Intuitive Operating System by Provision-ISR.

Ossia is the latest OS for Provision-ISR's DVR/NVR systems, it is one of the most innovative operating system in the market. As the heart of your system it's present rich and advance features, answering all your surveillance needs.

Applications

Private houses

Small/medium business

Buildings

Key Features

Web Interface + Remote Cloud Access

Experience the full advantages of the Ossia OS on an identical interface between local and web, including remote access via our cloud platform, provisionisr-cloud.com.

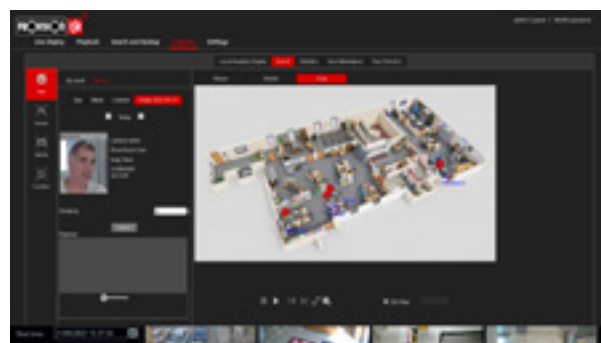

Analytics Dedicated Interface

Search and backup based on object attributes, including Humans, Vehicles, License plates, and Human Faces.

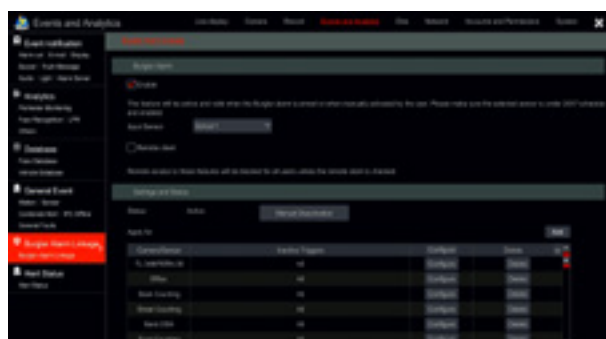

Search Playback And Backup

Enjoy features such as the time-slice search, which helps to find a playback in no time.

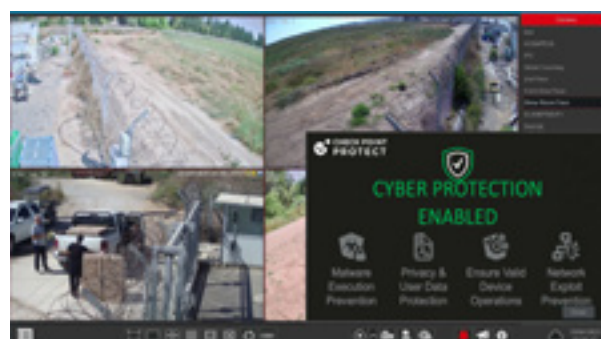

Over-Map Face Track

Upload a map, and track a chosen face over it.

Burglar Alarm

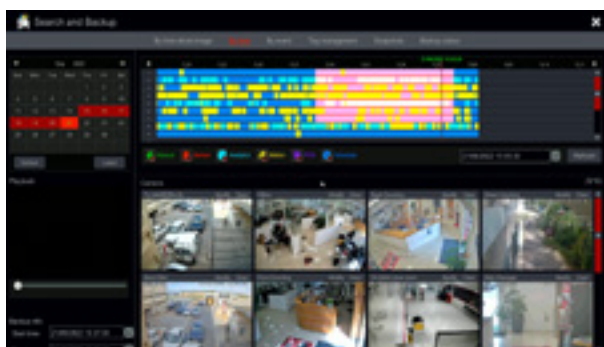

CCTV and alarm systems are now seamlessly connected! Control system triggers like recording, push notifications, sirens, and more using the arm/disarm function on any burglar system

Security At Highest Priority

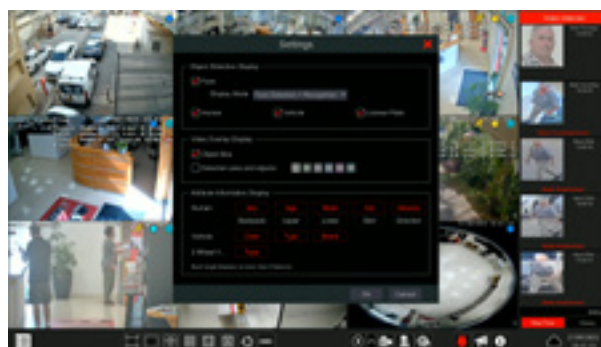

Protect IP-connected CCTV systems from cyber attacks with Check Point's IoT Protect Nano Agent, ensuring real-time protection and built-in firmware security for Provision-ISR devices.

Ossia O.S. Key Features

Batch Playback Handling

Multiple channels playback, backup, or delete in a Single click.

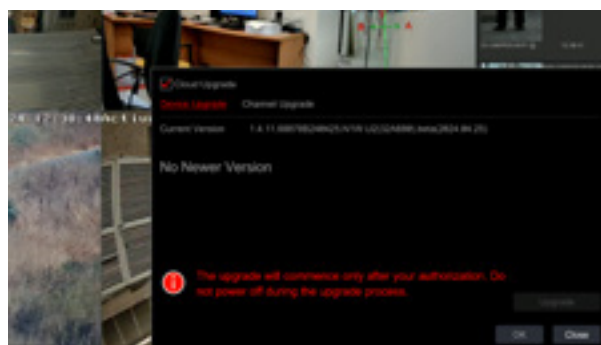

In Channel Appearance

Easily choose what data is visible on the channel, along with objects, faces, plates, and more.

Statistics Variations

Choose the time - and get instant traffic statistics for humans and vehicles which occurred at that specific time.

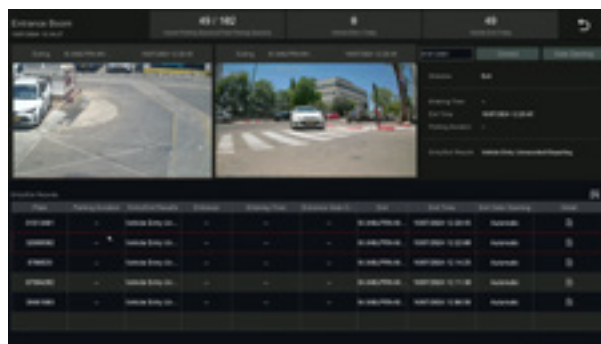

Device Cloud Updates

Stay effortlessly up to date with our innovative cloud update feature!

Intuitive operations

Audio broadcast, immediate alarm/relay activation, instant playback, and many more at a click of a button.

Parking Lot Management

Parking lot management feature offers seamless monitoring, license plate recognition, and efficient space utilization, ensuring enhanced security and operational efficiency for parking facilities.

VMS - Video Management Software

Intelligent web-client video management platform

Ossia VMS is an advanced and reliable Video Management Software specifically designed for CCTV systems featuring multiple devices controlled from a Single reliable platform. Centralized monitoring across bank branches, campus facilities, chain stores, or industrial complexes - provides operators with at-a-glance verification of incidents and management of multiple cameras through real-time floor plans and intelligent mapping features. The Ossia VMS solution provides a flexible operational approach for operators and manned guarding teams. The platform enables a rapid and decisive response to any incident with its unique and tailored features.

Standard version

Ossia VMS STANDARD VERSION supports up to 256 channels and is 100% License Free.

Enterprise version

Ossia VMS ENTERPRISE VERSION supports up to 10,000 channels and is a license-based platform.

Vertical markets

Shopping centers

Governments institutes

Governments institutes

Ossia VMS Key Features

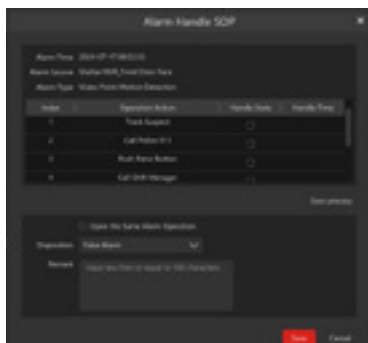

Main interface - live view

Complete live view control, including Fish-Eye views, PTZ Control, Instant Playback, Audio broadcast, Manual alarm activation, and many more.

Main interface - playback view

View playback from the recorder/storage server, back up multiple cameras at once and combine a face/license plate for your search.

SOP - Standard Operating Procedure

Predefined actions to be followed by the operator based on specific events.

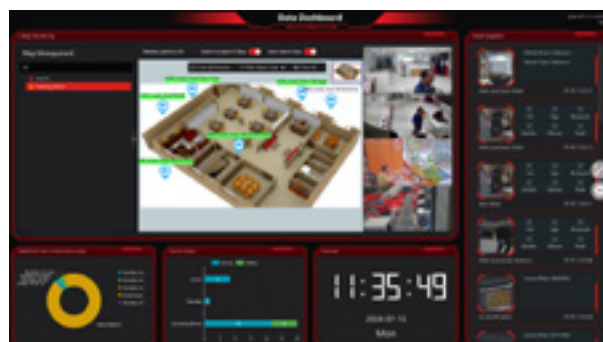

E-Map Live Monitoring & Face Tracking

Integrate Google Maps or custom maps for real-time event locations during live E-Map monitoring. Use VMS to search faces across devices and track movements within your custom E-Map.

Advanced Analytic Search

Use the VMS to search for faces across multiple devices and follow a face path over the E-map you have created.

Customized dashboard

Build your data dashboard with the displays of your choice out of the wide variety of the VMS features, such as analytics, videos, maps, playbacks, etc.

Ossia VMS Key Features

Decoding by dedicated HW

Create a custom video wall canvas with our TV Wall. Drag & drop live feeds, playback, and alarms for up to 144 channels. Each window is flexible - monitor live, review past events, or display alerts. Get unmatched situational awareness, your way.

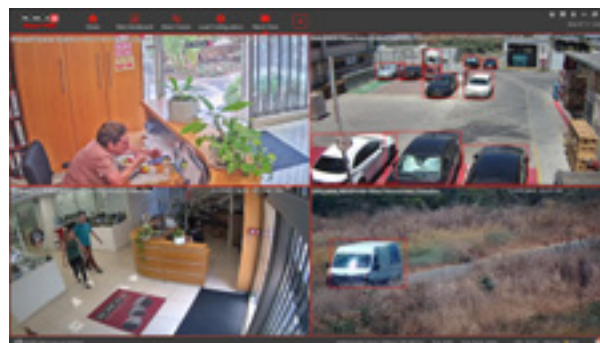

Remote settings

Set your devices straight from the VMS, starting from the most basic motion detection to the more advanced features such as DDA analytics and face detection.

System health monitor

The system health monitor allows the user to see the system and connected devices' status visually. It shows connectivity, alarm status, number of channels, and more. The user can even connect directly to his device's web client.

Alarm view

Choose which events will pop up on your monitor, including the specific event details.

LPR monitoring

Got a parking lot you need to manage? Now you can! The LPR monitoring can be used to fully manage a parking lot, including receiving entrance/exit statistics.

Management Mode

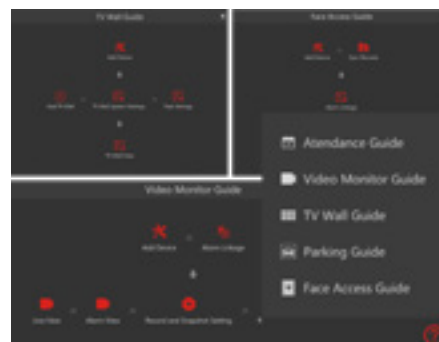

Focus on Management, Not Monitoring: Optimize your VMS with streamlined device management, face and license plate databases, and connections for up to 10,000 devices. Minimize server load with a 16-channel live view limit to reduce hardware costs and boost efficiency.

Ossia VMS Key Features

Object counting and occupancy control

Ossia VMS uses counting cameras for real-time occupancy data, managing flow with entry limits and customizable tasks. It offers triggers and real-time data, comparing statistics, and visualizing traffic in graphs and tables.

Interactive Help Guides

Use the Interactive Help Guide for easy setup. Its flow chart simplifies configuring popular modules like video monitoring and TV wall setups.

Access Control Function

Our access control module supports real-time monitoring, displays door statuses, and enables one-click operations. Use E-Map Live Monitoring to map access devices for live operations and view alarm information.

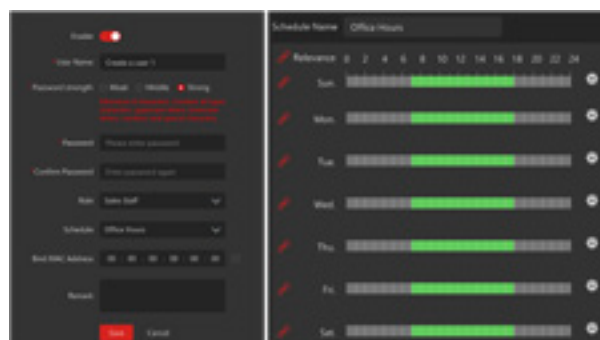

People Group Management

Effortlessly manage permission groups with schedules and triggers. Sync database groups from Ossia VMS to intercom, NVRs, and IPCs for efficient access management.

Vehicle Group Management

Direct synchronization of license plates with LPR devices ensures continuous operation, even during connection losses. From one central location, our VMS now lets you categorize license plates into groups and push these groups to different NVRs and LPR IPCs seamlessly.

VMS User Scheduled Access

This feature ensures security for shift workers and multi-staffed monitoring stations. Set precise schedules, camera access, and permissions to prevent unauthorized entry. Denied access for users outside designated schedules enhances control and security.

Provision CAM 2 Mobile APP

The App you always dreamt of is in the pocket of your jeans.

Provision Cam2 is the installers' first choice for their professional needs, yet clear-cut to be the end-users favorite App for everyday surveillance.
Provision Cam2 is a free iOS and Android App.

Key Features

AI-based playback

Face database management

Sharing

LPR search

Fish-Eye support

QR code sharing

Talk and listen capabilities

Account based

Provision Cam2 Key Features

DDA analytics search

Search events by specific analytics and object attributes for precise, time-saving efficiency.

Simple Playback Filtering

Easily search and find specific event playbacks!

Freedom of choice

Provision-ISR App allows you to choose what's best for you!

It's all about sharing

Share your video playbacks on any social media you like with a click of a button.

All you need is APP

Access all the features you can do locally on your recording device from the App

Face recognition

Capture faces directly and keep your face database!

Notify me

Always stay connected by getting push notifications!

Account access

Account-based users can now sign in from any other phone and get all their device lists

Johnson Control Integration

One App to Control It All. Control DSC or Visonic alarms directly through the CAM 2 app, plus bind zones with cameras to get visual alarm verifications.

IP Series

B-Sight

2MP - 4MP

Our B-Sight series provide you with everything you need for a Basic installation.

B-Sight cameras guarantee a superior image quality, improved night performance and make an outstanding value for money solution.

S-Sight

2MP - 4MP - 8MP

Our S-Sight series provide you with everything you need for a SIMPLE installation.

S-Sight cameras guarantee a superior image quality, improved night performance and make an outstanding value for money solution and enhanced video analytics functions based on Artificial Intelligence (DDA™ Video Analytics and Face Recognition).

Eye-Sight

2MP - 4MP - 6MP - 8MP

Our Eye-Sight series aims at the security professionals seeking a proficient line featuring outstanding image quality, full connectivity, and enhanced video analytics functions based on Artificial Intelligence (DDA™ Video Analytics and Face Recognition).

Smart-Sight

2MP - 4MP - 5MP

Our Smart-Sight Series includes high-performance AI Cameras designed for specific purposes and applications. The Smart-Sight components: the sensor, optics, CPU, lighting, Etc., were specially selected to deliver the most accurate AI results for the required application.

Intelligent auto tracking PTZ

2MP - 4MP

If you're monitoring large areas such as parking lots, industrial sites, or convention centers, Provision-ISR PTZ cameras allow you to monitor the overall area and focus on suspicious activity.

Video Intercom System

Safety starts at the doorstep with Provision-ISR technology.

INT-320WIPN

Our Intercom System utilizes advanced **Deep 3D facial recognition** for precise identification, paired with a **high-resolution WDR camera**, wide-angle **2.3mm lens**, **IR night vision**, and **2.4GHz Wi-Fi/Ethernet connectivity** for clear footage. With Power over Ethernet (**PoE**) for easy installation and compatibility with iOS/Android, which offers **local storage** (up to 256GB SD Card), it prioritizes privacy with end-to-end encryption, complying with **NDAA policies & restrictions**.

Configurable Access Control provides personalized security with customizable options for a **2-step authentication process**. The Built-in Microphone and Speaker offer crystal-clear **two-way audio** for seamless visitor interaction. A dedicated Call Button simplifies communication, granting direct access to corresponding monitors (up to 8), the Cam2 App, and the Ossia VMS system. Additionally, the Intercom System's Weather-Resistant Design, with an **IP65 rating**, ensures durability in all weather conditions.

- Max. resolution: 2MP (1920×1080 25/30FPS)
- Lens: 2.3mm with a wide field of view 132° Horizontal
- True WDR (120dB), BLC, HLC, ROI
- 3D Face Detection & Face Recognition Technology
- Access control function supporting Mifare & EMC RFID proximity cards
- Wireless 802.11b/g/n 2.4GHz
- 2-Way Audio Built-in Microphone & Speaker
- 2m IR LED lights
- Tampering alarm support
- Remote Monitoring: IE Browsing, VMS Software, Provision Cam2 Mobile App
- Door Lock support; Door Sensor Support; Open Door Button
- IP65 Rating - dust ingress and water jets

MON-TCH7

With its **standalone functionality**, the 7" frame monitor is an independent powerhouse, yet when paired with our Intercom, it transforms into the **ultimate control center**.

Equipped with advanced features, this indoor monitor unit serves as a central hub for surveillance camera integration, offering live views of up to **4 cameras simultaneously**, and with **two-way audio**, one-way video, and **door-unlocking capabilities**, it provides unparalleled convenience and functionality.

The monitor supports microSD cards up to 256GB for **local storage**, automatically capturing snapshots of callers and recording video footage for later review. You can enjoy a personalized experience with **custom ringtones** and a **do-not-disturb option**, and with connectivity options like Ethernet, **PoE**, and **2.4GHz Wi-Fi**, as well as **8 alarm inputs** for sensors, stay informed and in control at all times.

- Screen Size: 7" IPS Touch Screen
- Max. resolution: 1024x600
- Brightness: 300cd/m2
- Compression: H.265+ / H.265 / H.264 / MJPEG
- SD Card: Manual Record (up to 256GB)
- 8CH input
- Wireless 802.11b/g/n 2.4GHz
- 2-Way Audio: Built-in Microphone & Speaker
- ONVIF Support
- Weight: ~360g
- Power: DC12V/~200mA / PoE/~6W

DB-320WIPN

Doorbell cameras, also known as Video Doorbells, are smart home security devices that allow homeowners to keep an eye on their front door and receive alerts when someone approaches or rings the Doorbell. By incorporating artificial intelligence algorithms, the Doorbell can analyze and interpret video footage, thus providing more advanced features and functionality.

- Max. resolution: 2MP (1920×1080)
- Lens: 2.3mm @F2.2 with a wide field of view 139° Horizontal
- Face Detection Technology
- Access control function supporting Mifare proximity cards
- Wireless 802.11b/g/n 2.4GHz
- 2-Way Audio Built-in Microphone & Speaker
- 2 IR and 1 customizable white LED lights
- Tampering alarm and door contact alarm support
- Remote Monitoring: IE Browsing, VMS Software, Provision Cam2 Mobile App
- Exit Button support; Door Unlock wiring 1 NO 1 NC
- IP65 Rating - Protected from water spray from any direction

PR-CHIME

Radio-based Chime with 8 different tones and 5 volume levels

- 8 Tones
- Magnetic mounting
- Magnetic separate base for nonmagnetic areas
- Adjustable volume
- Low battery reminder

Solar Cellular IP Camera Kit

Solar Brilliance & Cellular Resilience - Powering Your Protection

SOL1-240ADSRN-36

This state-of-the-art security solution harnesses the power of the sun and cellular connectivity for unparalleled performance and eco-friendliness. Ideal for residential, commercial, and industrial settings, this advanced standalone camera redefines surveillance with its wireless design and high-tech features.

With its comprehensive kit, our Solar Cellular IP Camera sets a new standard for convenience and reliability with no wiring hassles and effortless installation and operation.

Artificial Intelligence

Provision-ISR's DDA™ Video Analytics technology distinguishes between humans, 2-wheeled, and 4-wheeled vehicles, improving surveillance accuracy. The DDA™ system includes line crossing and sterile area monitoring for thorough security coverage.

Smart Alert

Flash and sound serve as deterrents (strobe light and speaker). When the camera detects a DDA™ Analytics event, you can opt for on-site alerts via strobe lighting, pre-recorded message, or both, bolstering security with visible and audible deterrents.

Color Night Vision

Unlike traditional methods reliant on infrared illumination, our Solar Cellular IP Camera redefines low-light monitoring by capturing vibrant, full-color images even in the darkest environments.

Technology Overview

Our Solar Cellular IP Camera is a reliable and flexible security solution that uses solar power, whether direct sunlight or just regular daylight, ensuring continuous operation without needing external power sources. Its durable aluminium and polycarbonate construction maintains cellular signal integrity and withstands harsh weather conditions.

Specification Highlights

- Max. resolution: 4MP (2560×1440)
- Lens: 3.6mm 92° Horizontal
- 24/7 Full-Color Day Mode
- 2 High-Power White LED: Full power: 20m Low power: 10m
- Red/Blue Strobe lights
- 1-Way Audio Audio in and Built-in Microphone & Speaker
- General Analytics: Camera Tampering
- AI (Object Recognition): DDA Sterile Area, DDA Line Crossing
- PIR: Angle - Horizontal 82° / Vertical 50° Range - up to 15m
- IP65 Rating for IP camera / IP67 Rating for Solar Panel
- Remote Monitoring: IE Browsing, VMS Software, Provision Cam2 Mobile App

NVR

Network Video Recorders

In standard installations - the NVR is the heart of the IP System.

It is responsible for smooth communication with the cameras and the constant recording of all the data received from the connected cameras.

Unlike DVRs, the NVR doesn't compress the video Signal received from the IP camera but only stores it the same way as the camera already compresses it.

CONVENTIONAL NVRs

These NVRs are connected to the network and communicate with the IP cameras through the general network, without a direct IP camera connection. This provides the installer the highest flexibility in the design of the system and the wiring. Basic knowledge in networking and general IP configuration is required.

POE NVRs

These NVRs perform as a local network switch by creating a closed internal network for the IP cameras. The IP cameras are connected directly to the NVR by one network cable which will provide PoE power and automatically configure the camera for display & record. These NVRs may also perform as conventional NVRs by dedicating some channels to communicating with any ONVIF camera connected to the network. No previous knowledge is required for this type of installation.

Switch PoE

Switch PoE

STANDARD 10/100 Mbps

Synonymous with high reliability and easy installation, Provision-ISR's 10/100 Mbps PoE line has been meticulously designed for standard IP surveillance systems.

With options of 4/8/16/24 ports, standard up-link, and SFP ports (depending on the model), this line offers a suitable solution for any type of installation.

All models comply with IEEE 802.3 and automatically detect power-consuming devices (PD) and their energy consumption level.

SWITCH POE PROFESSIONAL 10/100/1000 Mbps

The 1,000Mbps (gigabit) PoE switches are designed for security industry professionals.

The models with 16/24 ports feature an LCD monitor located on the front panel, which allows for viewing the following system information: Single channel output power (W), Overload protection (OLP), Short circuit protection (SCP), Low voltage/Overvoltage alarms, High temperature alarms.

SWITCH POE LCD

An intuitive Color LCD panel positioned on the front of the switch Simplifies Ethernet and PD PoE management.

The LCD panel enables efficient management of large-scale networks, such as enterprises, hotels, shopping malls, government buildings, and other public areas. It provides various special management and status functions, including PoE management and status, port management and status, switch mode, bandwidth control, PD control, and maintenance checks.

KEEP ALIVE

The "KEEP ALIVE" feature of Provision-ISR's PoE switches is designed to detect a malfunctioning Powered Device (PD) that has caused communication disruption.

The feature restarts the hardware by removing and restoring the power supply.

If the connected camera is drawing power but not generating data traffic, it will be automatically restarted! This function can be individually set for each of the PoE ports!

CCTV MODE

The TVCC (Closed Circuit Television) mode is actually a preconfigured VLAN (not customizable by the user) that prevents all communications between the down-link ports.

The TVCC mode limits communication to 10 Mbps to increase stability.

The absence of communication between the down-link ports (VLAN) helps improve network security and data transmission efficiency.

By limiting the communication speed to 10 Mbps, the communication distance can be increased up to a maximum of 250 meters.

Switch PoE 10/100 Mbps

TVCC MODE: Up to 250m at 10 Mbps, no communication between down-link ports, PoE (8W Max), Surge protection. Compliant with IEEE802.3af/at.

PoESP-0124W SPLITTER ETHERNET 1 CH POE

- Adjustable output: 5VDC/2A, 9VDC/2A o 12VDC/2A
- Maximum Power Output: Up To 24W
- Short-Circuit Protection
- High Efficiency DC/DC Converter

PoESP-0172W SPLITTER ETHERNET 1 CH POE

- Output: 24VDC / 3A
- Maximum Power Output: Up To 72W
- Short-Circuit Protection
- High Efficiency DC/DC Converter
- DC Jack / Terminal Connector Output

PoEI-0130 | PoEI-0190 ETHERNET INJECTOR 1 CH POE

- Down-link: 1x 100 Mbps
- Output: PoEI-0130 max 30W - PoEI-0190 max 90W
- Internal power supply (require 110/220AC input)
- Distance: up to 100 Meters
- Built-in surge protection

PoER-01 EXTENDER (REPEATER) 1 CH POE

- Extends PoE Ethernet range up to additional 100 meters (10/100Mbps Ethernet)
- No additional power supply is required
- Automatically detects and protects PoE equipment from being damaged by incorrect installation

PoER-02 EXTENDER (REPEATER) 1 TO 2 CH POE

- Extends PoE range up to additional 150 Meters (10/100Mbps Ethernet)
- 11 ch Input / 2 Ch Output
- No additional power supply is required
- Automatically detects and protects PoE equipment from being damaged by incorrect installation

DCoE-01 NON-POE POWER OVER ETHERNET CONVERTER

- Set-Transmitter/Receiver
- 50 Meters working distance
- Camera DC power supply needed
- Supplies DC power input to the camera - Not PoE

HD Series

Cameras

Basic

2MP -3K

Series marked for the installer looking for a high-level camera emphasizing the difference in image quality.
 The Pro series cameras are suitable for indoor and outdoor applications where professional video surveillance is required.

Pro

2MP - 3K - 8MP

Series marked for the installer looking for a high-level camera emphasizing the difference in image quality.
 The Pro series cameras are suitable for indoor and outdoor applications where professional video surveillance is required.

Provision-ISR HD range also includes:

A series of PTZ cameras for wide-area coverage

A series of special cameras specifically designed for non-conventional applications (box, hidden and PIR cameras)

HD Cameras

DVR

Digital Video Recorders

DVR systems are the “heart” of any CCTV installation.

All information streamed from the cameras accumulates in the DVR. The DVR captures the video signal coming from the camera, converts and saves it in digital format.

Therefore, the DVR's quality is as important as the cameras' when it comes down to the final video resolution. Moreover, since all the recording data is saved and rewritten repeatedly on the DVR, it must be an extremely reliable and high-standard product. Provision-ISR DVRs are designed and manufactured according to researched and practiced knowledge over many years of experience.

All DVRs use the advanced H.264-H.265 video compression format to deliver maximum video quality while using minimum storage volume.

Provision-ISR DVRs are made of the highest quality components and are adapted to work in a wide range of different conditions and applications.

All of our DVRs stand out for their “full feature” operating system with a user-friendly graphical interface running from its powerful processor.

Depending on the model, our DVRs include digital VGA and HDMI monitor out, Analogue video out, audio in/out, RS-485 for PTZ control, and alarm in/alarm out sockets.

The range of DVRs is also supported by a robust network function for remote monitoring, complete remote configuration and mobile device application for remote monitoring.

PRODUCT RANGE ACCESSORIES

The term “ONE STOP SHOP” is the definition that best represents Provision-ISR’s offering. The brand’s catalog includes a wide range of accessories to complement the product lineup: test monitors, power supplies, brackets, junction boxes, connectors, baluns, and everything a security professional needs to build and complete a CCTV system.

USB Alarm BOX

Expand the “Alarms” functionality of your device by using our plug-and-play IO-1606 Alarm Box!
All you need to do is connect the “box” to your device using the provided USB cable and instantly get 16 Alarm inputs and 6 Alarm outputs!

| Specifications | | |
|----------------|----------------------|------------------------------|
| IO-1606 | | |
| Connectivity | Alarms Input | 16 Dry contacts |
| | Alarms Output | 6 Dry contacts |
| | Connection Interface | Micro USB |
| | Power supply | 5VDC/1A |
| | Power Consumption | <5W |
| Housing | Bracket | Wall Mount |
| | Dimensions | 140mmx74mmx29mm |
| | Weight(gross) | 180g |
| | Work Environment | -10°C~50°C, 10%~90% Humidity |

HDMI Accessories

| PR-HDMItoVGA | |
|---|--|
| HDMI to VGA | |
| Converts HDMI to VGA output | |
| <ul style="list-style-type: none">• Supports: all HD formats up to 1080P @ 30Hz• Support HDMI 1.4b• No support for HDMI audio (Will be lost)• No power required | |
| PR-HDeX (4K) | |
| HDMI Repeater | |
| It repeats and regenerates an entering HDMI signal and allows a second HDMI cable for a total of 40m (131ft). | |
| <ul style="list-style-type: none">• Supports: all HD formats up to 4K @ 30Hz• Support HDMI 1.4b• Support up to 40 meters total transmission distance (AWG 26 cable standard)• 1080P resolution: input up to 15 meters, output up to 25 meters• 4K resolution: input up to 5 meters, output up to 8 meters• Note: working distance may be affected by the cable quality and length.• No power required | |
| PR-SP102 (4K) | |
| Splitter HDMI 1 a 2 | |
| It splits a single HDMI input signal into 2 identical output signals. | |
| <ul style="list-style-type: none">• Split one HDMI input signal into 2 HDMI output signals• Support HDMI resolution up to 4K@30Hz• Support digital audio format: DTS-HD/Dolby-true HD/DTS/Dolby-AC3/DSD/HD(HBR)• Supported HDMI cable distance: (AWG 26 cable standard)• 1080P resolution: input up to 15 meters, output up to 15 meters• 4k resolution: input up to 8 meters, output up to 8 meters• Note: Working distance may be affected by the cable quality and length.• DC5V power supply needed (USB Power cable included) | |
| PR-SP104 (4K) | |
| Splitter HDMI da 1 a 4 | |
| It splits a single HDMI input signal into 4 identical output signals. | |
| <ul style="list-style-type: none">• Separate 1 HDMI in to 4 HDMI out• Support HDMI resolution up to 4K@30Hz• Support digital audio format: DTS-HD/Dolby-true HD/ DTS/ Dolby-AC3/ DSD/ HD(HBR)• Supported HDMI cable distance: (AWG 26 cable standard)• 1080p resolution: input up to 15 meters, output up to 15 meters• 4k resolution: input up to 8 meters, output up to 8 meters• Note: Working Distance may be affected by the cable quality and length• Include DC5V power supply | |
| PR-SW301 (4K) | |
| HDMI Switcher 3 a 1 | |
| It incorporates the connection of 3 HDMI sources into a single HDMI display. After connection, you can select the input manually or automatically by the device. | |
| <ul style="list-style-type: none">• Compatible with HDMI 1.4a• Support up to 4K@30Hz.• Deep color 12bit per channel• “Smart switching” function that can detect live HDMI signal in different channels and switch to it automatically• No power supply required for standard installation. If the HDMI output cable exceeds 5m – a CD5V power supply will be required (Not included) | |

HDMI Accessories

PR-4IN1-Con

Analogue HD to HDMI/VGA/BNC Converter

It converts the Analogue HD signal to an HDMI/VGA/BNC signal for direct connection to a standard display

- Up to HD 2MP signals (AHD/CVI/TVI/CVBS)
- HDMI output compatible with HDCP, HDMI1.4
- HDMI output resolutions: 720P@50/60Hz, 1080P@50/60Hz
- VGA output resolutions: 800x600@60Hz, 1024x768@60Hz, 1366x768@60Hz, 1280x720@60Hz, 920x1080@60Hz
- Selectable output and resolution by a physical button on the device
- Supports both NTSC/PAL Video inputs –Automatic detection
- Maximum output distance: HDMI: 20 meters, VGA: 5 meters, CVBS: 500 meters

PR-HDoNet-E

HDMI extender su Cat5e/Cat6

It converts the Analogue HD signal to an HDMI/VGA/BNC signal for direct connection to a standard display

- Working distance: up to 10m distance over cat5e cable, up to 20m over Cat6 cable
- HDMI 1.3&3D support
- Support video resolution of up to 1080P@60Hz
- Support format audio: DTS-HD/Dolby-true HD/LPCM7.1/DTS/Dolby AC3/DSD
- Power supply not required

PR-HDoNet+

HDMI extender su Cat5e/Cat6

It converts the Analogue HD signal to an HDMI/VGA/BNC signal for direct connection to a standard display

- Working distance: up to 40m distance over cat5e cable, up to 60m over Cat6 cable
- HDMI 1.3&3D support
- 12Bit deep color and bandwidth of up to 225Mhz support
- Support video resolution of up to 1080P@60Hz
- Supported Audio formats: DTS-HD/Dolby-true HD/LPCM7.1/DTS/Dolby- AC3/DSD
- IR signal transmission (PR-HDoNet(IR) model only)
- DC5V power supply included

PR-HDKVMoNet

Extender HDMI USB KVM su Cat5r/Cat6

It transmits HDMI + USB + IR signals over Ethernet cable

- Working distance: up to 100m distance over cat5e cable, up to 130m over Cat6 cable
- HDMI1.3 & 3D Support
- 12Bit deep color and bandwidth of up to 225Mhz support
- Support video resolution of up to 1080P@60Hz
- Supported Audio formats: DTS-HD/Dolby-true HD/LPCM7.1/DTS/ DolbyAC3/DSD
- Support USB2.0 Keyboard and mouse transmission
- Support IR signal transmission
- DC5V power supplies included

Balun / High power balun

PTR-101V-HD-8

1CH 8MP Video Passive Balun

- Passive transmission - No power required
- 8MP 4in1 support: AHD / CVI /TVI / CVBS.
- Transmission Distance: AHD / CVBS - 200M / CVI / TVI - 150M. •Friendly “Tool Free” Terminal Connector
- Built-in TVS for Surge Protection
- Anti-Static Design
- Wave Filter Design
- Designed for Cat.5e/6 Cables

PTR-102VP-HD-8

1CH 8MP Video + Power Passive Balun

- Passive transmission - No additional power required
- 8MP 4in1 support: AHD / CVI /TVI / CVBS.
- Transmission Distance: AHD / CVBS - 200M, CVI / TVI - 150M
- Friendly “Tool Free” Terminal Connector
- Built-in TVS for Surge Protection
- Anti-Static Design
- Wave Filter Design
- Designed for Cat.5e/6 Cables

PTR-103VHP-HD

1CH HD Balun video + High power

- Passive transmission - No additional power required
- 5MP 4in1 support: AHD / CVI /TVI / CVBS
- Transmission Distance: AHD / CVBS / CVI / TVI- 200M
- Friendly “Tool Free” Terminal Connector
- Built-in TVS for Surge Protection
- High-Power Input: 12-36VDC
- Power output: 12VDC Stable Output
- Anti-Static Design
- Wave Filter Design
- Designed for Cat.5e/6 Cables

Ossia VMS

Dedicated Hardware

Provision-ISR Ossia VMS is an advanced and reliable software designed for CCTV systems featuring multiple devices that are controlled from a Single reliable platform.

Ossia VMS comes with dedicated VMS hardware that are planned, designed, and built by Provision-ISR, with the sole purpose of running the video management software while dedicating 100% of the system resources to the task.

OC-MSCL-S(DT)-V2

Client / Managment server

So Small. So powerful.

OC-MSCL-S(DT)-V2 server/workstation is mainly developed for small to medium-Sized security systems.

Provision-ISR delivers a winning solution to the field of security with designated hardware that runs embedded Ossia VMS.

This design makes the system far more stable, cost-worthy, and Simple to use. As a result, the device is fully dedicated to its task – CCTV management and operation.

Main Features

- 256 Channel support
- 64 Recorder support
- 8GB DDR RAM
- Live View and Playback
- E-Map Monitoring
- Analytics Support
- ONVIF Camera Support
- Auto Report Service Support
- PTZ Support
- Audio Support
- Alarm Support
- Mobile App Support

OC-MS-M(1U)

Management server

Provision-ISR's new management server makes a firm base for more extensive security systems to deal with the most demanding tasks.

Combining high performances and embedded Ossia VMS on the one hand and the ability to manage up to 512 channels on the other, the OC-MS-M(1U) makes a stable and robust solution for most security needs.

Main Features

- Pre-installed OSSIA VMS (Server + Client)
- 512 Channels license included
- Full WEB interface
- Total of 256 PC Clients / Mobile App Clients
- Up to 512 channels!
- Storage server compatibility
- Set & view AI analytics
- Face database management
- Fisheye special views support
- LPR Monitoring
- User Management
- Map support (including google maps)
- Decoder support
- Audio broadcast

OC-MS-XL(1U)-V2

Management server

Provision-ISR's new management server is designed to deal with the most demanding tasks and makes a firm base for more extensive security systems.

Combining high performances and embedded Ossia VMS on the one hand and the ability to manage up to 3K channels on the other, the OCMS-XL(1U) makes a stable and commanding solution for most security needs.

Main Features

- Pre-installed Ossia VMS (Server + Client)
- 512 Channels license included
- Full WEB interface
- Total of 256 PC Clients / Mobile App Clients
- Up to 3,000 channels!
- Storage server compatibility
- Set & view AI analytics
- Face database management
- Fish-eye special views support
- LPR Monitoring
- User Management
- Map support (including google maps)
- Decoder support
- Audio broadcast

Ossia VMS

Dedicated Hardware

OC-RS-16(3U)

Storage server

Maximum stability, reliability, and capacity

OC-RS-16(3U) has 16 Hot-Swap HDD trays, RAID capabilities, dual Ethernet, and a power supply.

Provision-ISR's Storage Server was planned, designed, and built for the sole purpose of storing massive amounts of data and keeping it as safe and redundant as it can be.

Main Features

- Data capacity increase - allows for a remarkable increase of playback history.
- Redundancy - thanks to RAID5, the data on the disks will be secured against disk faults and errors.
- Flexibility - hot-swap disk trays for fast disk insertion and removal.
- Dual PSU (power supply unit) - one is for backup in case of an electric failure.

DEC-0104N(1U)

Decoder

Provision-ISR DEC-0104(1U) decoder makes the difference when it comes to durability. The decoder can display up to 144 channels on four separate screens, taking the most resource-demanding task from the client – to itself.

The client is free to deal with the CCTV unexpected tasks such as handling events, playback, alarms, Etc.

Each of the 144 windows is dynamic: the user can choose to use it as a live window, playback window, or an alarm pop-up window!

Main Features

- 4 HDMI Output (Total)
- 2 x 4K Screen Output
- 1 HDMI Input
- Audio Support
- Live View
- Alarm Popup View
- Playback View
- PTZ control
- Up to 8MP Decoding

IP-KEY02 V2

Keyboard

Much more than a Simple accessory

Provision-ISR IP-KEY-02 keyboard is an excellent addition for control rooms, headquarters, or surveillance rooms.

It allows the control of numerous Decoders and IP PTZ cameras and the choice of the camera layout you want by a Single button press.

The operator can easily display up to 144 different channels located on four screens connected to the decoder and fully control IP PTZ cameras for a quick focus on a specific object in the scene.

Main Features

PTZ CAMERAS (IP ONLY)

- Total movement control
- Preset
- Cruise

DECODERS

- Layout control
- Live view
- Playback
- Alarm window
- PTZ control (IP and Analogue)
- Sequencing channels
